Modern communication technology offers BSA Scouts the exciting opportunity to make new Scout friends from other countries without ever leaving home...experience "JOTA/JOTI"

JOTA-JOTI is the largest International Scouting event in the world (around 750,000 participants in 2014). This event can certainly be one of the most exciting annual activities your unit can organize during a Scouting year. It is definitely an occasion when you can use every modern means of communication (lap-tops, smart-phones, ham radios) to reach out and communicate with Scouts world-wide. Discover what Scouts are like and what they're doing via modern communications systems!

Please come out and learn what our Scout Brothers and Sisters from around the world are doing while having loads of fun doing so!
